

## Brickwork Reinforcement

This type of product increase the rigidity of masonry panels by introducing steel into the bed joint of the wall, either to merely resist cracking or in a more structural sense.

## Product

### Window Reveal Plate

The Window Reveal Plate supports the first few bricks in a full brick (215mm deep) window reveal during construction. It is designed for the long leg of the plate to be built into the external leaf bed joint, providing a stable bearing for the reveal brick.

The reveal plate is designed to support the first couple of half brick courses only. Once the wall goes above the first couple of courses the reveal brickwork becomes self supporting.

Size: 250mm x 184mm.

Available in boxes of 50.

## Material Information

Manufactured in Grade 304 S/S  
Material thickness – 2.0mm

### Safety Precautions

Window Reveal Plates are manufactured from sheared plate and strip and may contain sharp edges. Suitable personal protection should always be used when handling/installing these products.
