

PVC-u Beads

PVC-u beads are now being used more and more, particularly in areas of high rainfall or extreme damp conditions. They provide an economical alternative to stainless steel products and are used in the same way as normal galvanised or stainless steel beads. They are manufactured from white high density polyvinylchloride high impact window grade material. Other colours are available and manufactured to order. The face of the bead is ribbed and perforated to produce a good plaster or mortar key and can be easily cut to size using a hacksaw.

TLPABBOX PVC-u Variable Angle No Nose Angle Bead With Mesh

A PVC meshed wing angle bead with adjustable/variable angle for protection of unusual angles/edges & corners in ETICS systems. Internal and external use.

Benefits

- Simple installation (with plaster dabs or appropriate fixings)
