

TLPARBESH PVC-u Arch Bead With Mesh

Data sheet

Issue Date:

June 2026

PVC-u Beads

PVC-u beads are now being used more and more, particularly in areas of high rainfall or extreme damp conditions. They provide an economical alternative to stainless steel products and are used in the same way as normal galvanised or stainless steel beads. They are manufactured from white high density polyvinylchloride high impact window grade material. Other colours are available and manufactured to order. The face of the bead is ribbed and perforated to produce a good plaster or mortar key and can be easily cut to size using a hacksaw.

TLPARBESH PVC-u Arch Bead With Mesh

PVC Arch Corner Bead for ETICS with glass fibre mesh for edge protection of arcs of various radii in thermal insulation systems, prevents hairline cracks, creates the ideal arch edge. Internal use only.

Benefits

- Simple installation (with plaster dabs or appropriate fixings)
- Cost effective
- Easy to cut (by use of tin snips or fine tooth saw)
- Non corrosive

Standard: Meets the equivalent standards required for metal bead to BS EN 13658-2:2005

Material: Exterior grade impact resistant UV stable unplasticized PVC-u

Code	Size	Per Box	Weight
TLPARBESH	2.5m x 100x150mm	50 lengths	9kgs
