

## PVC-u Beads

PVC-u beads are now being used more and more, particularly in areas of high rainfall or extreme damp conditions. They provide an economical alternative to stainless steel products and are used in the same way as normal galvanised or stainless steel beads. They are manufactured from white high density polyvinylchloride high impact window grade material. Other colours are available and manufactured to order. The face of the bead is ribbed and perforated to produce a good plaster or mortar key and can be easily cut to size using a hacksaw.

## TLPWRBLM PVC-u Standard Window Reveal Bead with lip/mesh

PVC Window reveal bead with glass fibre mesh and protective lip for clean finish & elastic connection of the window/door frame to render in thermal insulation systems (EIFS). Prevents render detachment from window or door frame, protective lip for aesthetic detail and tape protection which eliminates need for additional joint filling, protects frame against staining during rendering work.

### Benefits

- Simple installation (with plaster dabs or appropriate fixings)
- Cost effective
- Easy to cut (by use of tin snips or fine tooth saw)
- Non corrosive

**Standard:** Meets the equivalent standards required for metal bead to BS EN 13658-2:2005

**Material:** Exterior grade impact resistant UV stable unplasticized PVC-u

Code	Size	Per Box	Weight
TLPWRBLM6	2.4m x 6mm x 100mm	30 lengths	10kgs
TLPWRBLM9	2.4m x 9mm x 100mm	30 lengths	12kgs

Goods to be stored and transported laying down and in dry conditions.

Please dispose or recycle in accordance with waste management regulations.

**COSHH & Health & Safety.** Contains no substances hazardous to health. The comparative rough surface finish and sharp edges requires care when handling manually, to avoid risk of cuts and abrasions gloves should be worn.
