

PVC-u Beads

PVC-u beads are now being used more and more, particularly in areas of high rainfall or extreme damp conditions. They provide an economical alternative to stainless steel products and are used in the same way as normal galvanised or stainless steel beads. They are manufactured from white high density polyvinylchloride high impact window grade material. Other colours are available and manufactured to order. The face of the bead is ribbed and perforated to produce a good plaster or mortar key and can be easily cut to size using a hacksaw.

TLPWRB PVC-u Window Reveal Bead with Lip, Mesh and 2D Flex

PVC Window reveal bead with glass fibre mesh, protective lip and additional elastic connection in 2 directions for additional anti-crack protection. It provides a clean finish & elastic connection of the window/door frame to render in thermal insulation systems (EIFS). Prevents render detachment from window or door frame, protective lip for aesthetic detail and tape protection which eliminates need for additional joint filling, protects frame against staining during rendering work.. Internal and external use.

Benefits

- Simple installation (with plaster dabs or appropriate fixings)
- Cost effective
- Easy to cut (by use of tin snips or fine tooth saw)
- Non corrosive

Standard: Meets the equivalent standards required for metal bead to BS EN 13658-2:2005

Material: Exterior grade impact resistant UV stable unplasticized PVC-u

Code	Size	Per Box	Weight
TLPWRB0626	2.6m x 6mm x 100mm	30 lengths	11kgs
TLPWRB0926	2.6m x 9mm x 100mm	30 lengths	13kgs

Goods to be stored and transported laying down and in dry conditions.

Please dispose or recycle in accordance with waste management regulations.

COSHH & Health & Safety. Contains no substances hazardous to health. The comparative rough surface finish and sharp edges requires care when handling manually, to avoid risk of cuts and abrasions gloves should be worn.
